

Master's degree

Management and development of historical gardens

Academic year 2024/2025

Second level

Language: Italian

Coordinator: Professor Carlo Tosco (Politecnico di Torino)

Deputy Coordinator: Professor Marco Devecchi
(Università degli Studi di Torino)

Departments DIST and DISAFA

The Master's degree is promoted by the Consorzio delle Residenze Reali Sabaude (Consortium of the Royal Residences of Savoy), the inter-university Department of Territorial Science, Planning and Policy (DIST) of the Politecnico di Torino and the Department of Agricultural, Forestry and Food Sciences (DISAFA) of the Università degli Studi di Torino. The two departments have long developed joint research projects in the fields of landscape, land planning and the development of rural architectural heritage. The DISAFA will provide the Master's degree course with all the skills related to the agronomical and botanical sector, to which considerable space will be devoted in the lectures.

Reggia di Venaria Castello del Valentino

The demand for training in the public parks and historical gardens sector is growing dramatically due to the vast heritage of these assets in Italy. There is considerable interest from other countries in the recent experiences implemented in our country, and La Reggia di Venaria is a well-known point of reference at international level.

The aim of the Master's degree course is to train highly specialised professionals in the management, ecological protection, social use and cultural promotion of the heritage of historical parks and gardens. The course takes a dual approach: cultural growth and experience in the field, which will take place in the gardens of the Savoy residences of Venaria, Stupinigi, Palazzo Reale and Villa della Regina in Turin.

During the lecture cycles, students will learn about the historical development of the gardens, the regulations governing protection, the planning systems for green areas, the principles of landscape architecture and the basics of agronomical and botanical sciences.

During the applied training phase, the students will work at the royal residences, supervised by specialised staff with considerable experience in the field. Visits abroad to prestigious residences with public parks are also planned, taking advantage of the European network of relations of the Consorzio delle Residenze Reali Sabaude.

**REGISTRATIONS FROM 1 SEPTEMBER 2023
TO 30 NOVEMBER 2023**
