

Fondazione Compagnia di San Paolo.

We have been working for the common good since 1563, putting people in charge of their future. Our experience has taught us that the well-being of individuals is closely linked to that of their community. This is why we believe the Sustainable Development Goals (SDGs) set by the United Nations are a valuable opportunity to contribute to the future of humankind at all levels: we have taken up this challenge and organised ourselves accordingly.

We have three main Goals: **Culture**, **People** and **Planet**, which can be achieved through fourteen Missions. We are committed to preserving and increasing our assets in order to award grants and develop projects working alongside institutions and in collaboration with our auxiliary bodies. This is our commitment, for the common good and for everyone's future

Culture.

Art, Heritage,
Participation.
Let's imagine the future.

People.

Opportunity,
Independence, Inclusion.
Let's build the future.

Planet.

Knowledge, Development,
Quality of Life.
Let's support the future.

The support provided for the ambitious renovation project of the **Hercules Complex**, which includes the redevelopment of the entire archaeological area of the fountain, is particularly important for the Company as it concerns the last major restoration to be carried out at the **Reggia di Venaria**. It testifies to the constant commitment of Fondazione Compagnia di San Paolo to the **"Corona di Delizie"**. Since the 1990s we have been involved in vast programmes to restore and enhance the system, involving disbursements of approximately 50 million euros. The **Culture Goal's "Preserving Beauty" Mission**, under which the work on the Hercules Complex is taking place, is to preserve and safeguard the architectural, artistic and landscape heritage, recognising it as a vital resource for our local areas. For this reason, it is the subject of medium and long-term intervention and investment policies, developed through dialogue between the institutions to promote an effective use of available resources through specific agreements.
